

How can we make the construction process more sustainable from start to finish? Join a **GPRO Construction Management** training to find out and earn your GPRO Certificate! You'll learn about sustainability best practices and leave with actionable strategies for every phase of construction.

What is this course about?

Low-carbon, energy-efficient construction will play a critical role in complying with stringent building codes and achieving ambitious climate goals. These projects require an understanding of new technologies, implementation of new processes and improved coordination across disciplines.

GPRO CM provides students with sustainability best practices and actionable strategies for every phase of construction. Learn how to avoid common construction mistakes and leave the training with practical steps to manage successful, sustainable and cost-effective projects.

What will you learn?

By the end of this training, you will be able to:

- Explain the key coordination issues and documentation requirements that are unique to high-performance construction at each stage of a project
- Describe the responsibilities of the construction manager and project team to ensure building performance
- Implement sustainable construction processes and communicate required information to subcontractors and trades
- Coordinate testing, inspection, and commissioning activities to ensure intended performance

"GPRO offers a selection of some of the best organized and content-rich courses. The instructor made a point of learning who I was and took an interest in our local practice. That layer of personal touch is rarely seen in online trainings. It was pretty memorable to have a real and honest conversation, as if it was not virtual."

GPRO CM Student

Who is this course for?

This training is ideal for a range of construction professionals, including:

- Construction managers and general contractors
- Experienced tradespersons and trade forepersons
- Estimators and other office personnel
- Owner's representatives
- Project managers and site superintendents
- Students and apprentices in construction fields

What should you expect?

Live training

In-person or remote

8-hours

Certificate exam

7 AIA, 7 GBCI and 7 PDH credits

LEED Pilot Credit 81

Each training is taught by a highly knowledgeable and experienced instructor. After completing the training, you can earn a GPRO Construction Management Certificate by passing a 30-question multiple choice exam. Additionally, you'll gain access to short on-demand bonus courses on topics like construction waste management, energy code inspections, systems commissioning and more.
